Summary of significant accounting policies and other explanatory information

(All amounts are in ₹, unless otherwise stated)

1 Corporate information

Thought Minds Systems Private Limited (the 'Company') is a Private Limited Company, incorporated under the Companies Act, 2013 on 25 July, 2023 and registered at C1D, Heera Vastugramam, Kakkanad, Rajagiri Valley, Ernakulam, Kerala, 682039. The Company is engaged in the business of information technology and services.

2 Summary of significant accounting policies

a) Basis of preparation

The financial statements of the Company have been prepared in accordance with Generally Accepted Accounting Principles in India ('Indian GAAP'). The Company has prepared these financial statements to comply in all material respect with the accounting standards ('AS') notified under Section 133 of the Companies Act, 2013 read together with paragraph 7 of the Companies (Accounts) Rule, 2014 (as amended). The financial statements have been prepared on accrual basis and under the historical cost convention. The financial statement has been prepared for the period from July 25, 2023 (date of incorporation of the Company) to 31 March 2024.

All amounts included in the financial statements are reported in Indian rupees (in ₹) except share and per share data, unless otherwise stated. Due to rounding off, the numbers presented throughout the document may not add up precisely to the totals and percentages may not precisely reflect the absolute figures.

b) Basis of measurement

The financial statements have been prepared on the accrual and the historical cost convention except where the Indian GAAP requires a different accounting treatment.

c) Going concern

The financial statements have been prepared on the going concern basis which assumes that the Company will continue in operation existence in the foreseeable future.

d) Use of estimates

The preparation of the financial statements in conformity with Indian GAAP requires the management to make estimates and assumptions considered in the reported amounts of assets and liabilities (including contingent liabilities) and the reported income and expenses during the year. The management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ due to these estimates and the differences between the actual results and the estimates are recognised in the periods in which the results are known/ materialise.

Summary of significant accounting policies and other explanatory information

(All amounts are in ₹, unless otherwise stated)

e) Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on current / non current classification.

All assets and liabilities which are not current (as discussed in the below paragraphs) are classified as non-current assets and liabilities.

An asset is classified as current when it is expected to be realised or intended to be sold or consumed in normal operating cycle, held primary for the purpose of trading, expected to be realised within twelve months after the reporting period, or cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

A liability is classified as current when it is expected to be settled in normal operating cycle, it is held primarily for the purpose of trading, it is due to be settled within twelve months after the reporting period, or there is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

f) Foreign currency transactions

Initial recognition:

Transactions in the foreign currency are initially recorded at the exchange rate prevailing at the date of the transaction or at the rates that closely approximate the rate at the date of transaction.

Subsequent recognition:

Monetary assets and liabilities denominated in the foreign currency are restated at the exchange rate prevailing as at reporting date. Non-monetary assets and liabilities are carried at historical cost.

Exchange differences:

Exchange gain and loss arising on the settlement or on restatement of monetary assets and liabilities, are recognised as income or expenses in the statement of profit and loss.

g) Property, plant and equipment ('PPE')

An item is recognised as an asset, if and only if, it is probable that the future economic benefits associated with the item will flow to the Company and its cost can be measured reliably. PPE are initially recognised at cost. The initial cost of PPE comprises its purchase price (including non-refundable duties and taxes but excluding any trade discounts and rebates), and any directly attributable cost of bringing the asset to its working condition and location for its intended use.

Subsequent to initial recognition, PPE are stated at cost less accumulated depreciation and any impairment losses. When significant parts of property, plant and equipment are required to be replaced in regular intervals, the Company recognises such parts as separate component of assets. When as item of PPE is replaced, its carrying amount is de-recognised from the balance sheet and cost of the new item of PPE is recognised.

The expenditure that are incurred after the item of PPE is ready for its intended use, such as repairs and maintenance, are normally charged to the statement of profit and loss in the period in which such costs are incurred. However, in situations where the said expenditure can be measured reliably, and is probable that future economic benefits associated with it will flow to the Company, it is included in the asset's carrying value or as a separate asset, as appropriate.

Summary of significant accounting policies and other explanatory information

(All amounts are in ₹, unless otherwise stated)

Depreciation on PPE is computed using the Straight Line Method.

The Management's estimate of the useful lives for the various categories of tangible assets is as follows:

Asset Category	Useful Life
Computer Equipment	3 - 5 years
Furniture & Equipment	10 years
Electronic Equipments	6 - 7 years

The cost and accumulated depreciation for PPE sold, scrapped, retired or otherwise disposed off are derecognised from the balance sheet and the resulting gains / losses are included in the statement of profit and loss within other expenses / other income.

Capital Work-in Progress includes direct expenses incurred fot the development of product.

h) Impairment of property, plant and equipment

The carrying amounts of assets are reviewed for impairment at each reporting date. An impairment loss is recognised for the amount by which the assets' carrying amount exceeds its recoverable amount. The recoverable amount is the higher of the assets' net selling price and value in use. To calculate value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market rates and the risks specific to the asset. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash generating unit to which the asset belongs. Net selling price is the best estimate of the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

i) Cash and cash equivalents

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of deposit), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

j) Provisions and contingent liability

Provisions are recognised when the Company has a present obligation as a result of past event, it is more likely than not that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

Summary of significant accounting policies and other explanatory information

(All amounts are in ₹, unless otherwise stated)

2 Summary of significant accounting policies (Cont'd)

k) Income taxes

Current tax:

The current tax is calculated on the basis of the tax rates, laws and regulations, which have been enacted or substantively enacted as at the reporting date. The payment made in excess / (shortfall) of the Company's income tax obligation for the year are recognised in the balance sheet under income tax assets / under current liabilities as current tax liabilities.

Deferred tax:

Deferred tax charge or credit reflects the tax effect of timing differences between accounting income and taxable income for the year. The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognised using the tax rates that have been enacted or substantively enacted by the Balance Sheet date. Deferred tax assets are recognised only to the extent there is reasonable certainty that the assets can be realised in future. However, in case of unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence of realisation of such assets. Deferred tax assets are reviewed as at each Balance Sheet date and written down or written-up to reflect the amount that is reasonably / virtually certain (as the case may be) to be realised.

Deferred tax liabilities are recognized for all taxable timing differences. Deferred tax assets are recognized for deductible timing differences only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set-off current tax assets against current tax liabilities and the deferred tax assets and deferred taxes relate to the same taxable entity and the same taxation authority.

I) Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the amount of revenue can be reliably measured with no uncertainty as regards to ultimate collection.

Revenue from sale of goods, are recognised when the significant risks and rewards of ownership of the goods are transferred to the customer, which generally coincides with the delivery or dispatch of goods depending of the terms and condition of the agreement. Sales are stated at net of taxes and trade discounts.

Revenue from service is recognised and accounted on rendering of services in accordance with the terms of arrangement by reference to the stage of completion of the contract.

Summary of significant accounting policies and other explanatory information

(All amounts are in ₹, unless otherwise stated)

2 Summary of significant accounting policies (Cont'd)

m) Employee benefits

The Company's employee benefits mainly include wages, salaries and bonuses. The employee benefits are recognised in the period in which the associated services are rendered by the company's employees. Short term employee benefits are recognised in the statement of profit and loss at undiscounted amounts during the period in which the services have been rendered.

n) Leases

A finance lease (also known as a capital lease or a sales lease) is a type of lease in which a Company is typically the legal owner of the asset for the duration of the lease, while the lessee not only has operating control over the asset, but also has a substantial share of the economic risks and returns from the change in the valuation of the underlying asset.

If "substantially all the risks and rewards" of ownership are transferred to the lessee then it is a finance lease. If it is not a finance lease then it is an operating lease. Leases, where the lessor effectively retains substantially all the risks and benefits of ownership of the leased term are classified as operating leases. Operating lease payments are recognized as an expense in the Statement of income and expenditure on a straight-line basis over the lease term.
